JYVÄSKYLÄN YLIOPISTO
UNIVERSITY OF JYVÄSKYLÄ

Establishing a Digital Repository

Ari Häyrinen
Information system expert
Open Science Centre
ari.hayrinen@jyu.fi

Why?

ACCESS

- provides access to research outputs
- place for digital heritage

PROMOTE

- provides a shop window for people interested in what the institution has to offer (openoasis.org)

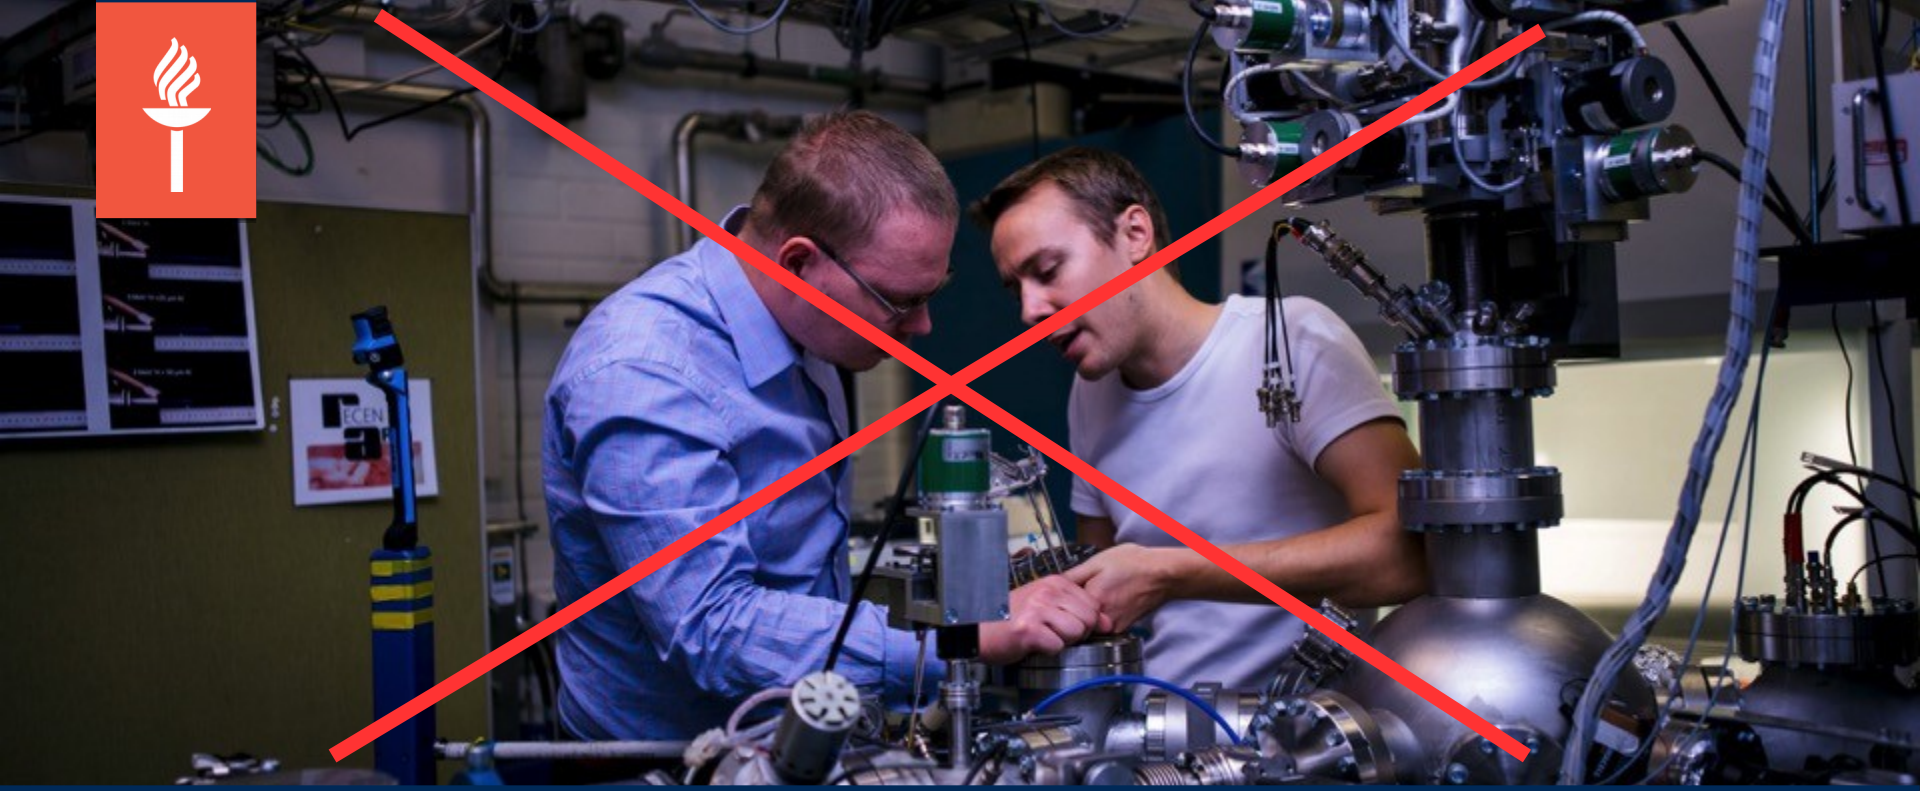
PRESERVE

Why?

Can be used as a CRIS (at certain extent)

MONITORING

- research monitoring and assessment
- open access statistics
- monitoring research output by funders



Establishing a digital repository
is **not** a technical project!

link

It is about guidance, policies, practices, processes and education

INPUT

OUTPUT

Established routines

Can be set up in couple of hours

INPUT hard part!

Can take years to establish

Policies, processes, practices

Education of researchers and staff

Carrot and stick

”If you do not submit your article, then...”

OUTPUT

Established routines

Can be set up in couple of hours

Who is responsible of the repository software?
Who is responsible of the server maintenance?
Where one can find support for batch uploads?
Support for development?

What kind of material is saved?
Who is responsible of the quality of metadata?
Who will produce reports of research output?
How scientific articles are submitted?
Who controls user permissions?
How about master's theses?
Is research data allowed?
...

JYX 2.0

JYX 2.0

- JYX 2.0 launched just few weeks ago link
- Layout fitted to university web layout
- Theses process renewed
- Possibility to make exhibitions
- Admin tools link
- New parallel publishing process from CRIS (coming)

JYVÄSKYLÄN YLIOPISTO
UNIVERSITY OF JYVÄSKYLÄ

Establishing a Digital Repository

Thank you!
