

## ACKNOWLEDGING OUR REVIEWERS (January 2007– May 2009)

*Human Technology: An Interdisciplinary Journal on Humans in ICT Environments* is an interdisciplinary, online scholarly journal investigating the multiple facets of humans in interaction with technologies. Because we are an interdisciplinary journal, we have sought out experts from around the world in a variety of fields related to the field of human–technology. In the last two-and-a-half years, nearly a hundred scholars, in universities, research organizations, and businesses, have kindly accepted the invitation to review the dozens of manuscripts submitted and invited for consideration in *Human Technology*. We are deeply grateful for the time, effort, and wise recommendations these individuals have provided the editorial staff of *Human Technology* in determining which manuscripts were suitable for publication.
