

Finnish Open Science and Research Initiative (ATT) 2014-2017

- A cross-administrative initiative established by the Ministry of Education and Culture for the promotion of information availability and open science
- Goal to make Finland a leading country in openness of science and research
- Scope includes publications, research data, and methods
- Provides researchers with practical knowledge in how they as individuals can implement open science
- Several services offered by the Ministry to researchers at www.openscience.fi

Finland – a model country for green Open Access

is a joint project by University of Jyväskylä and University of Eastern Finland. Funded by the Ministry of Education and Culture.

Project integrates CRIS, IR and external metadata sources into one comprehensive, cost effective and general model for parallel publishing.

During the project model will be tested and implemented in several Finnish universities.

Aim of the project is to lift the Green Open Access activity in Finland to international top level.

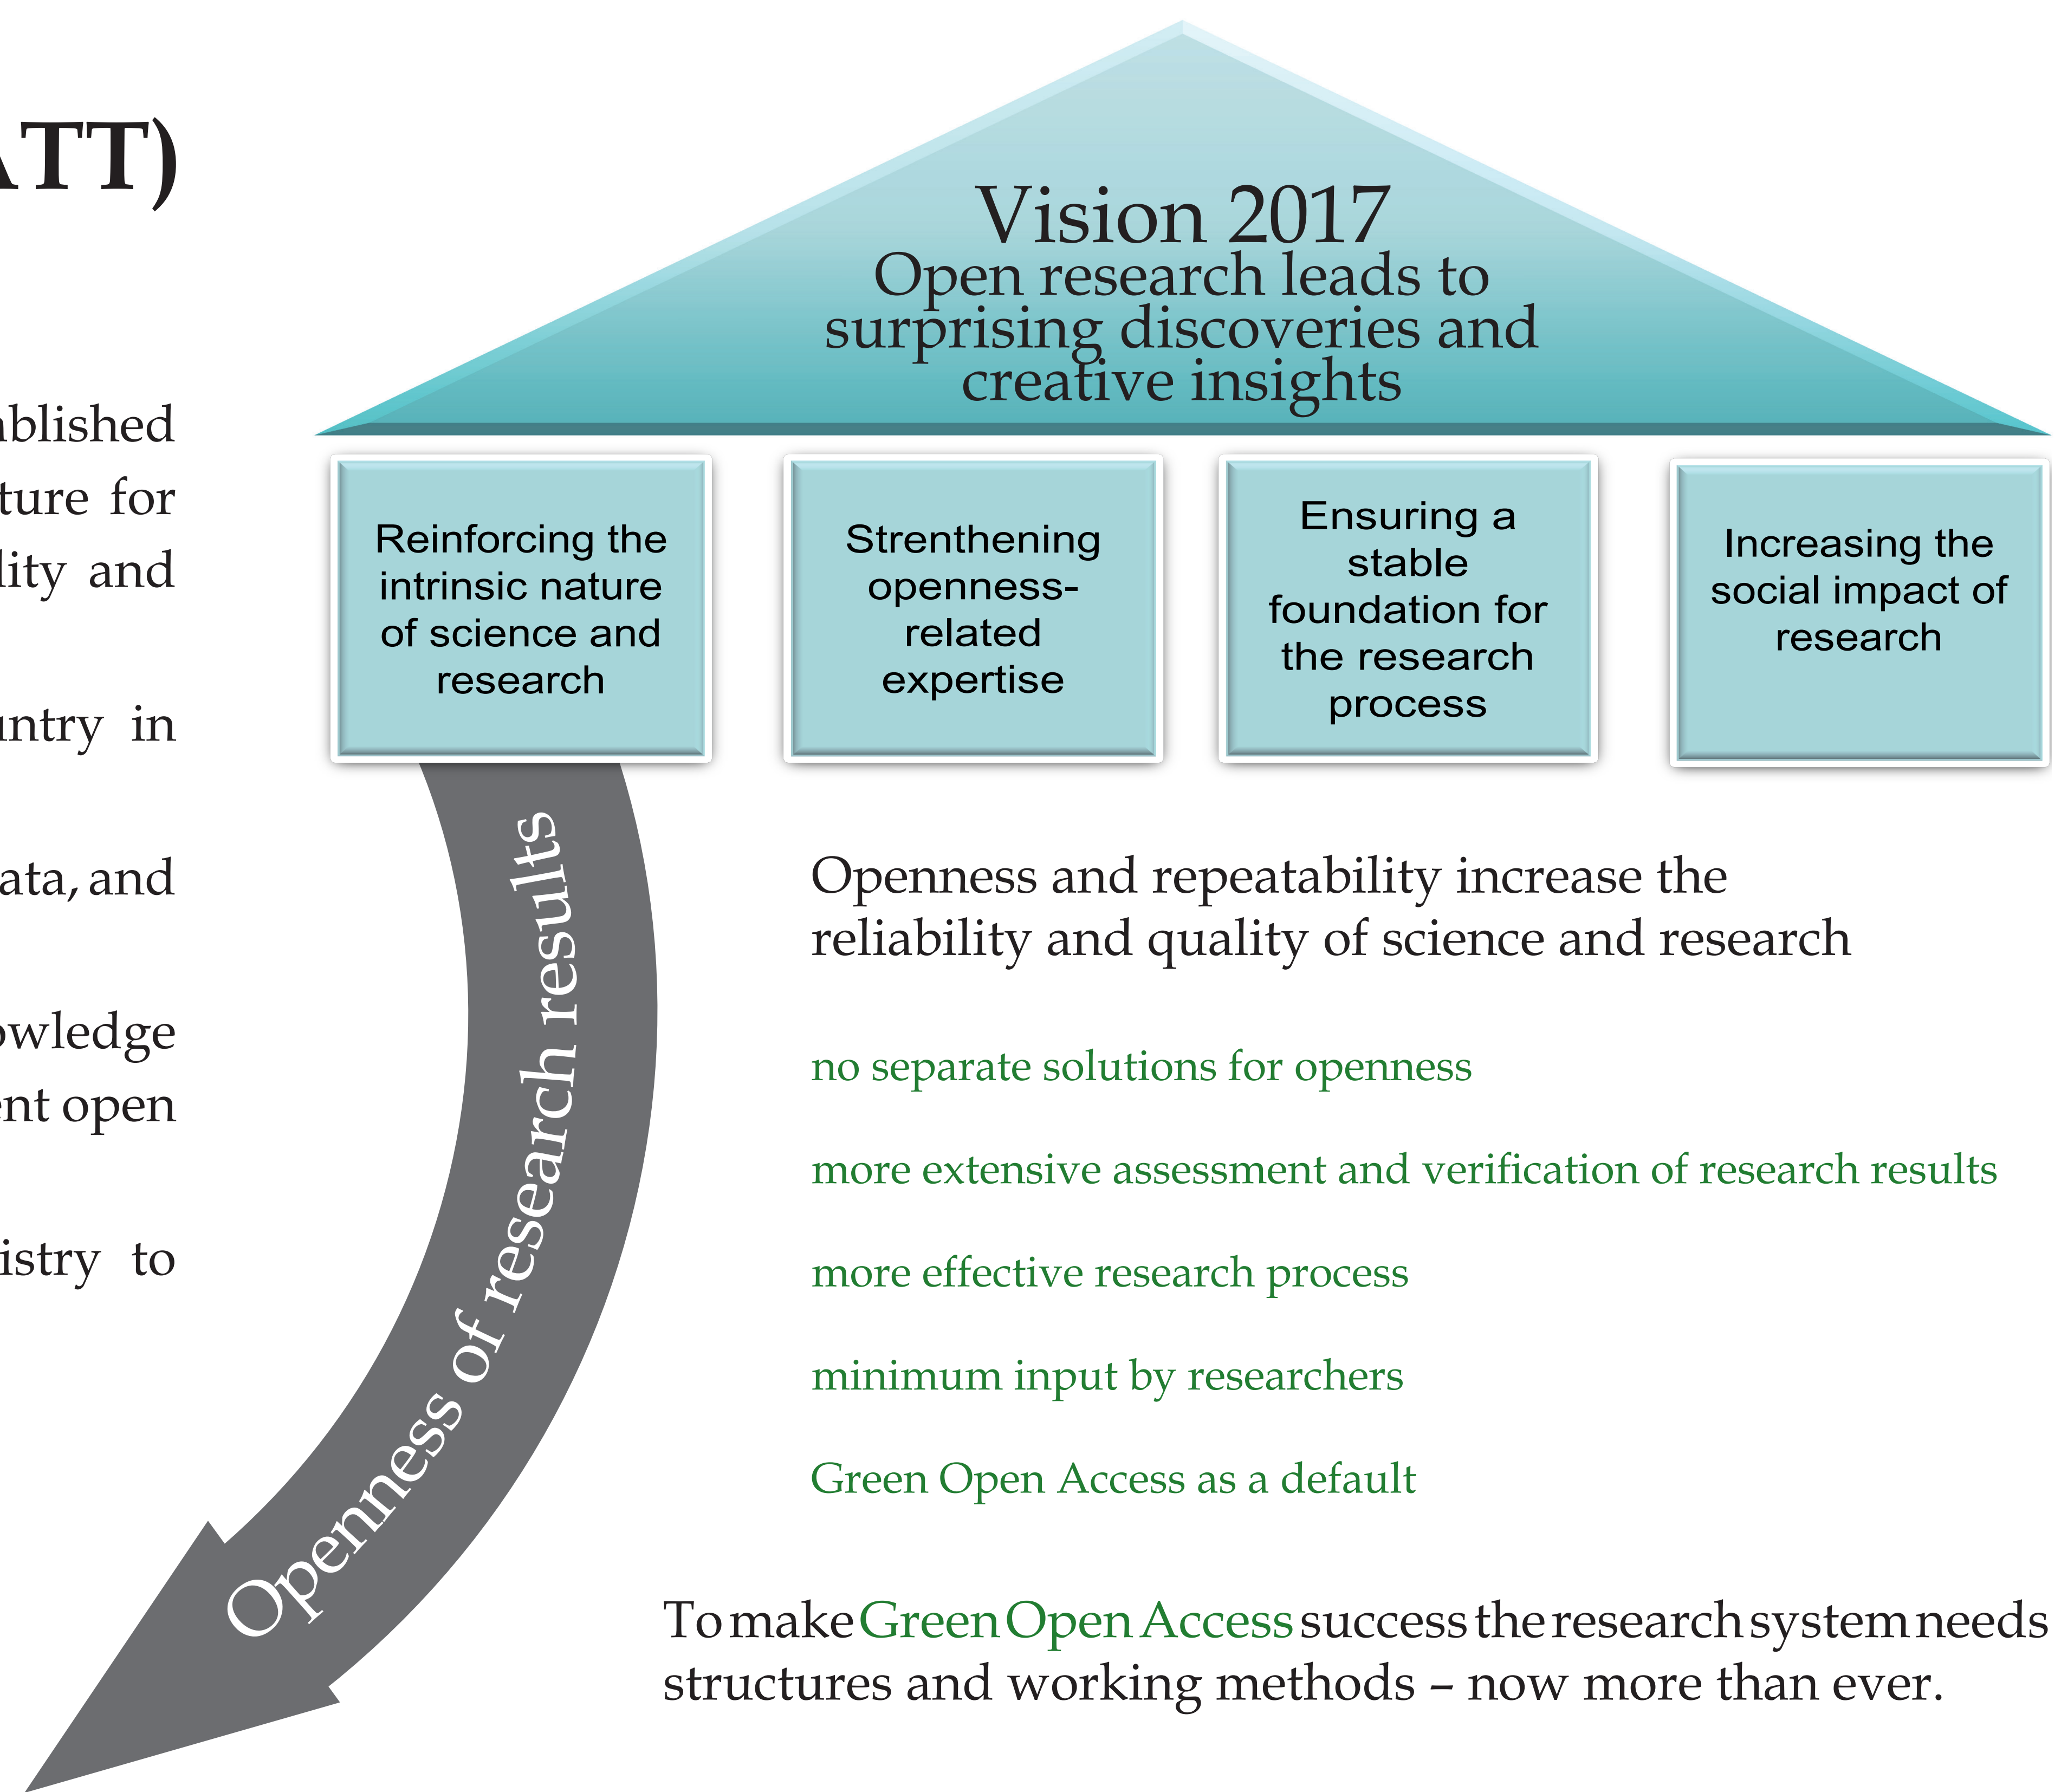

Results of the project will be published in several research and conference papers.

Open Science and Research vision

No extra work for researchers, **university library** is the key player
